

## **Greenergy launches a new edition of its graduate scholarship program to foster young talent**

- The program offers a 12-month training period, with dual education through a postgraduate course at Camilo José Cela University
- It highlights Greenergy's commitment to job creation in its markets, contributing to the education of future generations
- This marks the third edition of the program, in collaboration with the University-Business Foundation (FUE)

Madrid, September 26, 2024.- Greenergy has launched a new edition of Greenergy Talent Program, its scholarship program for recent graduates, designed to attract and integrate young talent into the company. This marks the third edition of the program, developed in collaboration with the University-Business Foundation (FUE).

As in previous years, the program offers young talent the opportunity to be part of a growing, publicly-listed global company in a strategic sector such as renewable energy, which plays a crucial role in the decarbonization of the economy. Greenergy operates across Europe, the United States, and Latin America, with more than ten offices and a workforce of over 600 employees.

Greenergy Talent Program provides a 12-month training cycle in areas such as Business Development, Legal, Accounting, Treasury, ESG, Auditing, and IPP, among others. Its dual approach stands out, as participants will also pursue a master's degree in organizational management, Key Competencies, and Data Analytics at Camilo José Cela University.

A notable aspect of the program is its international focus, as many activities will take place globally, with English as the primary language of instruction. Participants will benefit from the guidance and support of an internal mentor throughout the program.

Applications are open until October 14, and it is aimed at students in their final year of study. This partnership between Greenergy and FUE aims to promote the employment of graduates from diverse fields such as engineering, business administration, and law.

"With this third edition of Greenergy Talent Program, we are reinforcing our commitment to fostering young talent and supporting their professional development in the renewable energy sector. This program not only helps us attract top recent graduates, but also plays a part in shaping future generations who will be key in the transition towards decarbonization," said Luis Rivas, Human Resources Director at Greenergy.

Further details about the program can be found at: <https://www.talentoteca.es/greenergy/>.

#### About Greenergy Renovables:

Greenergy Renovables is a Spanish company created in 2007, an independent producer of energy from renewable sources, mainly photovoltaic and storage, listed on the Spanish stock exchange since 2015. Its business model covers all project phases, from development, through construction and financial structuring to plant operation and maintenance. The company has a global platform of more than 15 GW of solar in various stages of development in the eleven countries where it operates in the European, North American and Latin American markets.

#### About Fundación Universidad -Empresa:

The University-Business Foundation (FUE) – a private non-profit foundation with 50 years of experience in education, employment, and entrepreneurship – was established with the mission of bridging the gap between academia and the business world. Since its inception, it has developed high-quality, innovative programs, services, and initiatives to connect the professional and academic spheres, adapting to social, economic, and cultural changes, while providing tailored solutions to the evolving needs of businesses, educational institutions, and students.
