

## **Greenergy signs its first non-solar PPA with EMOAC in Chile for 15 years**

- It is one of the first companies in the world to sign a contract of this kind
- The agreement provides the supply of more than 8 TWh during the 15- year term of the contract
- It is part of Greenergy's growth plans, linked to energy storage, which will be unveiled during their Capital Markets Day

Madrid, November 17th 2023.- Greenergy has signed its first non-solar PPA to supply the Chilean company EMOAC with green energy for a 15 year period. With this project, Greenergy becomes one of the first companies in the world to sign a PPA combining solar power and storage projects.

Under this agreement, Greenergy will supply more than 8 TWh to EMOAC, a company dedicated to the commercialization of renewable energies and a subsidiary of Copec, Chile's leading fuel distribution company. It is expected to start between 2026 and 2027.

This operation is framed within the company's growth plans, related to energy storage, which it will be unveiled at the Capital Markets Day on November 21.

Greenergy arrived to Chile in 2012, centralizing all its operations in South America. After more than a decade in the country, Greenergy has become the company with the most connected plants, more than 70, and with projects that add up to more than 1.3GW, including those under construction and those already built. "Greenergy has been a pioneer since its origins and with this agreement it once again reaches a historic milestone in the renewables industry," states David Ruiz de Andrés, CEO of Greenergy.

EMOAC is one of the leading renewable energy trading companies in Chile and has more than 10 years of experience in providing customer service, digitalization, energy efficiency and supply for electroterminals.

"For EMOAC - just like COPEC - the customer is at the heart of our operations, which is why this agreement is a relevant milestone, as it allows us to continue driving them towards the energy transition and growing with more and better solutions across Chile," notes Vannia Toro, Partner and General Manager of EMOAC.

### *About Greenergy Renovables*

Greenergy Renovables is a Spanish company created in 2007, an independent producer of energy from renewable sources, mainly photovoltaic, wind and storage, listed on the Spanish stock exchange since 2015. Its business model covers all project phases, from development, through construction and financial structuring to plant operation and maintenance. The company has a global platform of more than 15 GW in various stages of development in the eleven countries where it operates in the European (Spain, Italy, Germany, Poland and the United Kingdom), North American (United States) and Latin American (Chile, Peru, Mexico, Argentina and Colombia) markets.
