

Greenergy sign collaboration agreements with Médecins Sans Frontières to support their work within Ukraine

- **It will fund medical aid in Ukraine through Doctors Without Borders, and assist refugees in Poland together with Polish Humanitarian Action (PAH)**
- **Promote the recruitment of refugees for its offices in Poland, Spain and the United Kingdom.**

Madrid, March 2022 - Greenergy, the renewable energy producer and specialist in the development, construction and management of photovoltaic, wind and storage projects, has signed collaboration agreements with NGOs to support its medical assistance and humanitarian aid work inside Ukraine and to refugees in neighboring countries.

Greenergy will also promote the incorporation of Ukrainian refugees into its teams in Poland, Spain and the United Kingdom, in engineering and/or finance positions, thus offering them opportunities to regain economic stability and continue with their professional career development.

The donation made has gone in identical proportions to Doctors Without Borders (MSF) and the Polish NGO Polish Humanitarian Action (PAH), to support the work of these organizations in two areas.

In the case of MSF, these resources will be focused on its operations to respond to this post-conflict emergency on the borders and within Ukraine, where few NGOs are currently operational. Given its specialization in conflict situations, Médecins Sans Frontières is able to get medical personnel and materials to where they are needed most. The support provided by Greenergy is equivalent to the purchase of all the medical supplies and medicines needed to perform 400 emergency surgical operations. Through its collaboration with the Polish NGO, Greenergy will channel its support to refugees arriving in Poland fleeing war.

According to Ewelina Szulc, Country Manager of Greenergy in Poland, "with this initiative we want to show our full support to the Ukrainian people and show our solidarity with the victims of this humanitarian crisis, contributing to alleviate, on the one hand, the needs of people inside Ukraine in very extreme situations and, on the other hand, helping refugees to rebuild their lives."

About Greenergy Renovables

Greenergy Renovables is a Spanish company created in 2007, an independent producer of energy from renewable sources, mainly wind and photovoltaic, listed on the Continuous Market since 2019. Its business model covers all phases of the project, from development, through construction and financial structuring to operation and maintenance of the plants. The company has a global pipeline of more than 10 GW in various stages of development in the ten countries where it operates in the European (Spain, Italy, Poland and the United Kingdom), North American (United States) and Latin American (Chile, Peru, Mexico, Argentina and Colombia) markets.
