

Greenergy consolidates as one of the world's most sustainable energy companies, according to the Corporate Sustainability Assessment by S&P Global

- It highlights the improvement in Greenergy's environmental dimension, thanks to its new climate strategy, its Net Zero 2040 commitment and its environmental management.
- Ethifinance has also recognised Greenergy's work in ESG, with an improvement in its rating compared to the previous year.

Madrid, February 23, 2024.- Greenergy has been positioned in the top 15% of companies in the Electrical Utilities sector with the best score, according to the Corporate Sustainability Assessment (CSA) which is compiled annually by S&P Global and determines the composition of the prestigious Dow Jones Sustainability Index. The recognition is a further endorsement of its sustainability strategy, after the prestigious index has placed the company in 39th position out of a total of 259 companies analysed in this sector worldwide.

This is the third consecutive year in which Greenergy has participated in the S&P Global CSA, considered a benchmark for investors and which evaluates and compares the environmental, social and governance (ESG) performance of thousands of listed companies worldwide.

Greenergy stands out especially for its performance in the environmental dimension, as a result of the different initiatives promoted by the company, such as its new climate strategy, the Net Zero 2040 commitment and the environmental management carried out.

For Rocío Fernández, Greenergy's sustainability director, "this recognition is the confirmation of the success of our first sustainability plan, which laid the foundations, and a motivation to continue moving forward and meeting the ambitious targets we have set ourselves in our new Sustainability Strategy 2024-2026".

Greenergy also in the Ethifinance ESG Rating 2023

In its quest for excellence in sustainability, Greenergy has also obtained a score of 80 out of 100 in the Ethifinance ESG Rating for 2023. This index analyses around 140 criteria distributed into four key pillars: governance, environment, social and relations with the external public.

In this edition, the company has achieved an improvement of 5 points compared to the previous year. Furthermore, it is within the average of the companies analysed in terms of the assessment of the four essential pillars.

About Greenergy Renewables:

Greenergy Renovables is a Spanish company created in 2007, an independent producer of energy from renewable sources, mainly photovoltaic and storage, listed on the Spanish stock exchange since 2015. Its business model covers all project phases, from development, through construction and financial structuring to plant operation and maintenance. The company has a global platform of more than 15 GW of solar in various stages of development in the eleven countries where it operates in the European (Spain, Italy, Germany, Poland and the United Kingdom), North American (United States) and Latin American (Chile, Peru, Mexico and Colombia) markets.
